Education

Seoul National University

PH.D. STUDENT IN ARTIFICIAL INTELLIGENCE

- **Current GPA:** 4.04/4.30
- A member of the SNU VGI Lab (Advisor: Prof. Jaesik Park)
- Received full scholarship for 5 semesters.

Seoul, South Korea

Sep. 2023 - Present

KwangWoon University

B.S. IN DIVISION OF ROBOTICS

- **GPA:** 3.81/4.50, **Major GPA:** 3.93/4.50
- Received full scholarship for 6 semesters.

Seoul, South Korea

Mar. 2016 - Feb. 2023

Professional Experience

Kakao Mobility

SOFTWARE · ROBOTICS ENGINEER (FULL-TIME)

- Developed a data collection system for autonomous vehicles.
- Researched visual SLAM and localization for real-world driving environments.

Pangyo, South Korea

Dec. 2021 - Apr. 2022

Stryx

SOFTWARE · ROBOTICS ENGINEER (COMPULSORY MILITARY SERVICE)

- Led software development for the hardware business unit.
- Developed a sensor data collection system for a mobile mapping platform.
- Researched and developed autonomous navigation for unmanned ground vehicles, including SLAM, localization, sensor fusion, and path planning.

Seoul, South Korea

Dec. 2019 - Dec. 2021

ROBOTIS

ROBOTICS ENGINEER (INTERN)

- Validated ROBOTIS OpenManipulator prior to its open-source release.
- Developed and published an example application for ROBOTIS OpenManipulator SARA.

Open Source Contributions

Selected Robotics Projects

- Author of **TLC-Calib**, the official implementation of Targetless LiDAR-Camera Calibration with Neural Gaussian Splatting (RA-L 2026).
- Maintainer of **ORB-SLAM3-ROS2**, a ROS 2 integration for the ORB-SLAM3 library.
- Contributor to **FAST-LIO**, fixing Velodyne LiDAR integration issues.
- Contributor to **LIO-SAM**, adding a ROS service for map saving.

MENTOR

Jul. 2019 - Sep. 2019

- Serviced the app, which provided a system for managing kindergarten students going to and from school and attendance using beacons.
- The high school team I coached won the grand prize among 10,000 teams.

RO:BIT (Robot Game Sports Team)

Seoul, South Korea

MEMBER & TEAM LEADER AT 2018

Jul. 2016 - Dec. 2018

- As a member of the humanoid team for 3 years, I participated in many external activities and competitions related to robots.
- I mainly researched and developed a robot algorithm called humanoid intelligence in games such as soccer, basketball and athletics, etc.
- In 2018, I led the team as the leader of the humanoid team and won awards in international competitions.
